

NATURAL GAS LINE REPLACEMENT

February 11, 2019

Start Date for Gas Line Replacement Project Pushed Back

The start date for gas line replacement work previously scheduled to begin in January for the Farnsworth Drive project in Parma has been pushed back to April 2019. We apologize for any inconvenience that may arise from the change in start dates. Please direct any questions or calls to Daniel Ball at (440) 242-7653. Thank you.

As the project is completed, the following steps may occur:

- 1. MARK the right of way and existing utilities** with flags, stakes and temporary paint.
- 2. REPLACE the main line.** This pipe usually runs underneath the street or alley.
- 3. REPLACE the service line.** This pipe runs from the main line to the meter that serves homes or business.
- 4. RELOCATE any indoor gas meters** to the outside of the home or business.
- 5. RESTORE all property** to the same condition, including sidewalks, lawns and driveways. It may be several days or even weeks between some of these steps.

We realize a project of this size may cause some inconveniences, and we apologize for this disruption. When the newly installed natural gas delivery system is complete it will continue to provide years of safe, reliable service to homes and business in the area.
